Volume II, Section 2 – Message Classes

Message Classes

The Message Class table describes the message classes that are to be used for sending and receiving data to and from the COD System.

- Message classes that end in an IN are for documents exported from a school system to the COD System

- Message classes that end in an OP are for documents imported to a school system from the COD System

Common Record Message Classes

The Common Record Message Class tables describe the message classes that are used when sending and receiving Common Record documents to and from the COD System.

Users are able to choose the message class in which they send and receive documents to and from the COD System. Message class options include the following:

- Non-program specific and non-award year specific. Example: COMRECIN, COMRECOP

- Non-program specific and award year specific (2007-2008).

- Program specific (Pell, Direct Loan, ACG and National SMART) and non-award year specific.

- Program specific (Pell, Direct Loan, ACG and National SMART) and award year specific (2007-2008).

Schools do not need to use all of the message classes listed in the table below. Use of these message classes will vary by school based on the schools' business processes and system software. For school initiated Common Records, schools can specify message class options when submitting documents. The COD System will return document responses in the OP message class that corresponds to the IN message class used to submit the document to the COD System. Schools will not be locked into a specific message class upon initial document submission. Instead, schools will be able to change message classes with each document submission to the COD System. For Receipts, the OP message class will be determined by the presence of a year indicator in the IN message class that the school used to submit the document to the COD System. For COD System Generated Responses, OP message classes used by the COD System will differ for each type of system generated response and will contain a year indicator.

The COD System will not validate the content of the Common Record document with the message class type used for submission. For example, schools can submit Pell Grant data for the 2007-2008 award year in the Direct Loan specific, non-award year specific message class (CRDLMYIN). The document will be processed by the COD System and the response will be returned in the corresponding OP message class (CRDLMYOP). If the document content does not correspond to the IN message class used for submission, the COD System will not determine the appropriate content specific message class in which to return the document response. Message class specificity is merely a mechanism that schools can use to differentiate between documents they have submitted to the COD System.

Non-Program Specific, Non-Award Year Specific

Message Class	Data Description	Destination Mailbox
COMRECIN	Common Record Documents containing data from any or multiple programs for any or multiple award years sent from school to COD System.	To TG71900
COMRECOP	Responses containing data from any or multiple programs for any or multiple award years sent from COD System.	From TG71900
